AIRFLEX PRO

KINESIOLOGY TAPE

Total Length:
6 METER

AIRFLEX PRO is performance engineered to work in the harshest environments. It's the world's only 100% synthetic kinesiology tape, re-engineered with stronger adhesive, to out last anything you can throw at it. It will keep you pain free and supported exactly where you need it.

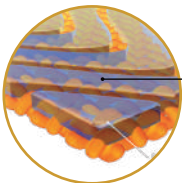

SPECIFICATIONS :

- 100% SYNTHETIC microfibers for better aquatic performance.
- UltraLite Elastic Core - for better support.
- Secondskin Adhesive for use in extreme conditions.
- Includes 24 strips precut per roll for easy handling.
- Includes protective travel case.
- Reflective safety design for use in the dark.
- Latex free for sensitive skin.
- Step-by-step instructions for applying.

Available Colour:

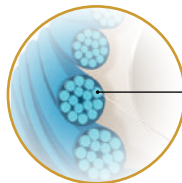

Why the AIRFLEX PRO is different from the other brand?

Patented second skin adhesive

SECONDSKIN ADHESIVE

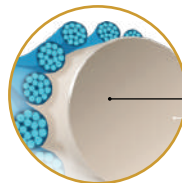

AIRFLEX PRO is engineered to perform in the harshest environments, to last for an entire week, through multiple runs, daily showers, in humidity, cold or in the pool. It features a patented Secondskin Adhesive that will go as long as you do, and no offense probably longer.

Funkless synthetic micro fibers

SYNTHETIC MICROFIBER

AIRFLEX PRO can be worn comfortably in the shower, in the pool or while riding big waves at microfibers. You triathletes, swimmers, surfers and sailors are sure to appreciate it. Synthetic microfibers are fast drying and provide superior weight-to-strength ratios. These fibers are also naturally anti-microbial, which allows for comfortable extended wear without the funk.

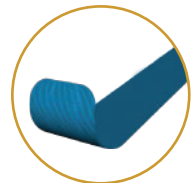

High recoil elastic core for improved support

SUPPORTS LIKE A BRACE

AIRFLEX PRO features a much longer elastic core which delivers better support for muscles, joints and tendons without restricting comfort and range of motion.

LONGER LASTING

AIRFLEX PRO's stronger elastic core retains its elasticity far better over time than cotton kinesiology tape. This means it will provide stronger support, for as long as you need it, and then some. Like top athletes, it relies on both strength and endurance to get the job done.

PRE CUT "I" STRIPS

AIRFLEX PRO is precut and ready to apply right out of the box. Precut strips have rounded corners which help to prevent the corners from snagging on things or the edges fraying. Each roll contains 24 strips (10 inch/strips). That's 6 meter of tape all 2 inches wide, for you mathletes out there.

GLOW IN THE DARK

Be seen. Be safe. AIRFLEX PRO features reflective elements that add even more functions to its form, perfect for use in low light conditions, road training, and reflecting the flash of action-shot paparazzi.

Flexband™
Made in Malaysia from Natural Rubber Latex
resistive exercise band
ANTI-SNAP

"A SPECIAL PRODUCTION PROCESS HAS MADE THE FLEXBAND TO ENDURE EXTREMELY HIGH TENSIONS. A SMALL CUT MAKING NO CONSEQUENCE.

OUR R&D TEAM HAS CHAMPIONED THE FLEXBAND TO BE VERY SAFE WITH ANTI-SNAP TECHNOLOGY."

What is Anti-Snap?

Anti-Snap is a design technology that will prevent the main cause of snaps - over stretching. The main purpose of this technology is to give more strength to the band when it is stretched until reaching the point where it will eventually snap.

Are Anti-Snap is really snap proof?

It will be really close as you are going to get. What we can assure you is that, you need to be really trying to break these band to make them snap. That's a fact. Simply said, if you are properly using the Flexband Anti-Snap resistive exercise band, the chances of it to snap are close to zero.

FleXband™

Made in Malaysia from Natural Rubber Latex

resistive exercise band

A 46M / ROLL

Colour	46M / Roll	Product Code
	SUNSHINE YELLOW (Extra Light) Size: 0.15mm x 15cm x 46m	FB-46M-SY
	THUNDER RED (Light) Size: 0.20mm x 15cm x 46m	FB-46M-TR
	FOREST GREEN (Medium) Size: 0.25mm x 15cm x 46m	FB-46M-FG
	MARINE BLUE (Heavy) Size: 0.30mm x 15cm x 46m	FB-46M-MB
	STORM BLACK (Extra Heavy) Size: 0.40mm x 15cm x 46m	FB-46M-SBL

Each colour of exercise band is 46M long and contains of individual colour. Product codes of each is mentioned as above.

B 30 PCS DISPENSER

Colour	30 pcs Dispenser	Product Code
	SUNSHINE YELLOW (Extra Light) Size: 0.15mm x 15cm x 1.5m	FB-30PCS-SY
	THUNDER RED (Light) Size: 0.20mm x 15cm x 1.5m	FB-30PCS-TR
	FOREST GREEN (Medium) Size: 0.25mm x 15cm x 1.5m	FB-30PCS-FG
	MARINE BLUE (Heavy) Size: 0.30mm x 15cm x 1.5m	FB-30PCS-MB
	STORM BLACK (Extra Heavy) Size: 0.40mm x 15cm x 1.5m	FB-30PCS-SBL

Each box contains of individual colour of exercise band.
Product Codes of each colour is mentioned as above.

FleXband Anti-Snap band are effective exercise products used in fitness and strength training. It has been through our R&D process and using the latest technology. Our less powder, latex and latex free exercise bands reduce the messiness of conventional powdery bands and also minimizes the possibility of an allergic reaction.

FleXband exercise band allows a large variety of exercises. From general wellness up to fitness programs, FleXband resistive exercise band is indicated for use in a variety of impairment:

- Resistance training for:
 - Postural impairments
 - Motor function impairments
 - Muscle performance impairments
- Stretching exercises for muscle length impairments
- Functional and sport-specific training for functional limitations.

C 3 IN 1 COMBO DISPENSER - MATCH YOUR NEED!

Colour	3 in 1 Combo Dispenser	Product Code
	SUNSHINE YELLOW (Extra Light) Size: 0.15mm x 15cm x 1.5m	FB-10PCS-SY
	THUNDER RED (Light) Size: 0.20mm x 15cm x 1.5m	FB-10PCS-TR
	FOREST GREEN (Medium) Size: 0.25mm x 15cm x 1.5m	FB-10PCS-FG

Flex PLATFORM

Exercise Platform

FLEX PLATFORM

Information | Features

Flex Platform, a great support for exercise and rehabilitation. It suits in all phases of rehabilitation and especially for those who are under Falls Prevention Programs. It provides excellent support to balance the upright position of trunk during proprioception exercise and upper and lower limb movements. It is the best to combine with MIRA REHAB to acquire the outermost benefit of Flex Platform.

Flex Platform is perfectly adaptable to MIRA Rehab system in:

- + Hip Frontal Flexion
- + Lunges
- + Side Strides
- + Spine Frontal Flexion
- + Hip Abduction
- + Knee Flexion
- + Side Taps
- + Squats

In addition, Flex Platform is also suitable to use during:

- + Resistive exercise band training
- + Loop band training
- + Tubing band training
- + Balance pad exercise
- + Bosu ball training

Suitable to support these exercises

Each item sold separately

Electrodes

MEDFLEX - ELECTRODES

Information | Features

Medflex is design with high quality hydrogel and strong conductive carbon film which gives the best performance on its intensity. It is latex free, Hypoallergenic with strong adhesive and ergonomically flexible to the surface attached. Medflex completes with a customized heat resistant pack to protect the inner products while it's resealable for hygienic storage.

- High quality hydrogel latex free, Hypoallergenic
- Strong conductive carbon film
- Strong adhesive and reusable
- Heat resistant pack

Benefits :

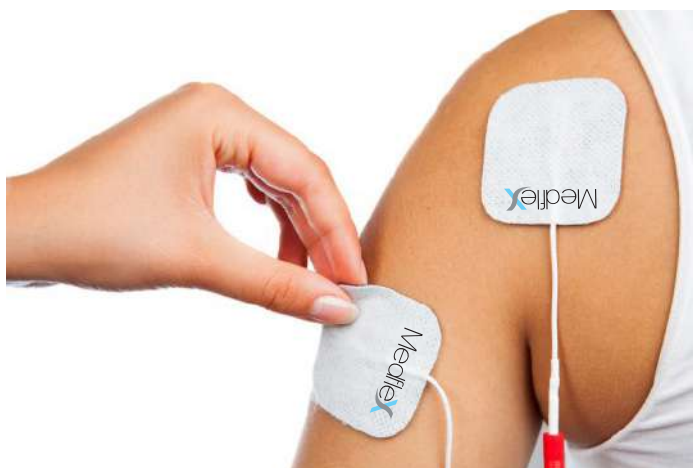

- Pain relief, and decreased inflammation of an irritated area.
- Increase range of motion, strength, and function due to reduced pain.
- Help to limit one's use of pain control medications, since it functions to intercept and block the nerves attempts at relaying information regarding pain to the brain.

Premium Pack

Resealable packaging designed for hygienic storage with recordable personal indication columns.

*Best Solution to improve efficacy
by continuous pulse pressor and cold therapy*

- The CryoFlex series cryo cuff with cooler is a newest medical device that combines compression with cold.
- This equipment are widely used in Medical Institutions, home, gym, sports teams and so on.
- It has remarkable effect in the treatment of the pain, inflammation, high fever and swelling

Features

- Main components are cooler and cuff, there are 9 different types for each body part.
- It is a combination of cryotherapy and static compression, commonly uses for the treatment of pain and inflammation after acute injury or surgical procedures.
- Anatomically designed to completely fit the injured part. Minimizes hemarthrosis, swelling and pain. safe, comfortable and no stimulation for the affected part.
- Compare with the traditional cold therapy, it is easy to operate and use.

Clinic Indication

Description	Model	Indication
Ankle Cuff	A2-M	Ideal use for acute sprains, trauma, post-op and rehabilitation
Shoulder Cuff	B2-M	Ideal use for trauma, post-op, rehabilitation and sports injuries
Thigh Cuff	C2-M	Ideal use for stress fractures, sports injuries and soft tissue injury
Calf Cuff	D2-M	Ideal use for acute injury, sports injuries and soft tissue injury
Back/Hip/Rib Cuff	E2-M	Ideal use for chronic/acute pain : post-op and sports injuries
Elbow Cuff	F2-M	Ideal use for epicondylitis (tennis elbow), Post-op and throwing injuries
Hand/Wrist Cuff	G2-M	Ideal use for carpet tunnel syndrome, tendonitis, post-op, sports injuries
Knee Cuff	H2-M	Ideal use for trauma, post-op, rehabilitation and sports injuries
Neck Cuff	J2-M	Ideal use for ICU and high fever
Cooler	CO-M	Ideal for post-operative recovery, trauma, athletic training rooms, home-use
Automatic Chill System	AC-M	Ideal for automatic chill system for the cuff

THERMOFLEX

MOIST HEAT PACK

MOIST HEAT PACK

Information | Features

To soothe from:

- Pain
- Strain
- Muscle spasm
- Whiplash
- Arthritis

RESUABLE . MICROWAVEABLE . EASY TO USE

The benefits of heat therapy are undeniable and truly impressive. Heat therapy can relieve stiffness and improve circulation by opening blood vessels - relieving pain from sprain, strain, muscle spasm, whiplash, arthritis, and many more conditions! But how does moist heat compare to dry heat therapy? There are many advantages to using moist heat therapy over traditional dry heat:

- Moist heat is more effective than dry heat in deeper tissue heating
- Moist heat penetrates more than dry heat at the same temperature
- Moist heat has additional capacity to change the tissue temperature rapidly and obtain more vigorous response from temperature receptors
- Patients often report greater relief of symptoms from moist heat

THERMOFLEXTOR

MOIST HEATING UNIT

MOIST HEATING UNIT

Information | Features

ThermorFlextormoist heat therapy maintain a constant water temperature and come in standard with exposed heating elements. These units provide for comfortable and effective moist heat therapy, promoting both easy cleaning and safety. The tank body, lid, bottom and tank housing all made from type 304 stainless steel for years of trouble-free use. The thermal pack fit onto a sturdy stainless steel, vinyl coated wire rack. Inside the unit is a heating element and temperature sensor.

Bottom feet keep the unit from slipping and from marring the surface of the countertops. Unit have a snapoff thermal protector to prevent overheating. A drain valve located on the back of the units makes them easy to clean. Our Moist Heating Units offered bottoms and are thermostatically controlled. the 6 hot packs are supplied as counter top models. The 12 hot packs are supplied as mobile models with 4 caster wheels.

FlexWAX

Paraffin Moist Heat Treatment

Product Code FW-6LBS

Product Code FW-6LBSLAV

PARAFFIN MOIST HEAT TREATMENT

Information | Features

The heated FlexWax releases warmth to smooth and soften any dry, chapped, rough or scaly skin on your hands, elbows, heels and feet. The paraffin treatment promotes healthy skin, rehabilitates deep tissue injuries, alleviates arthritis, reduces muscle tension, and relieves deep-tissue pain. Compatible with all paraffin wax warmers. FlexWax available in Unscented and Lavender to help moisturize and renew your skin. Ideal for both personal use with individual paraffin warmers or for clinical use in a highly-trafficked office.

MELTS WAX QUICKLY AND EVENLY TO GIVE YOU AN ENJOYABLE WAXING EXPERIENCE.

Enriched with Vitamin E and a blend of nourishing oils. It will leave the skin feeling luxuriously soft and deeply nourished. Pure paraffin delicately blended with quality oils ensuring a low melting point for safe effective use.

Available in 2 types (6 unit in 1 box):

- Unscented
- Lavender

Ingredients :

- Paraffin wax
- Vaseline
- Microcrystalline wax
- Mineral oil
- Vegetable Oil
- Vitamin E
- Fragrance
- Dyes

Warning :

Wax may burn if subjected to excessive heat.
Never heat this product over direct flame.

FlexWAXBATH

Paraffin Treatment Unit

PARAFFIN TREATMENT UNIT

Information | Features

The Flex Waxbath paraffin treatment unit provides a simple, effective method of applying heat to the surface of the hand or foot for increased circulation. The entire unit is made of stainless steel - a durable material that is more reliable than other tanks made of plastic, and has a low impact on the environment after the product's long life. The Flex Waxbath paraffin treatment unit is thermostatically controlled and furnished with a cover. A power indicator light shows that the paraffin is heating. The tank capacity come with two option, 6 and 18 lbs.

Description :

- Appropriate for a small clinic.
- Tank Capacity is available for 6 and 18 lbs. (2.72 and 8.17kgs) of paraffin.
- The entire unit is fabricated of durable stainless steel.
- The strength of stainless steel provides a durable advantage over the many competitive brands made of plastic.
- The tank is insulated and thermostatically controlled.
- The tank is furnished with a cover.
- Power Indicator light indicates that the paraffin is heating.

SplintFLEX

SplintSHEET

Common Specification

- i) Thermoplastic 1.6mm x 460mm x 610mm
- ii) Thermoplastic 2.4mm x 460mm x 610mm
- iii) Thermoplastic 3.2mm x 460mm x 610mm

What is SPLINT FLEX SplintSheet?

This is an external fixation material for orthopedics. It has advantages such as:

- Softened at low temperature
- High plasticity
- Shape memory function
- Good permeability
- Light weight
- High strength and toughness
- Easy to bond
- Good X-ray permeability
- Multiple heat molding
- Repeatable
- Easy doctor operation
- Support biodegradation

What is it for?

SPLINT FLEX SplintSHEET is applicable to static full fixation or semi-fixation of fracture in:

- Finger
- Wrist
- Elbow
- Shoulder joint
- Upper limb
- Feet
- Ankle
- Knee joint
- Head
- Neck
- Rib
- Spine and pelvis arthritis
- Burn and open fracture
- Positioning & fixation of radiotherapy
- Orthotics and orthosis making

FlexTENS

TENS Therapy (Transcutaneous Nerve Stimulation)

FLEX TENS

Information | Features

The FlexTens (EV-804) features 5 TENS modes with adjustable pulse width, rate and timer. It's the most popular model of Medi Lifesports TENS series. It's easy to use and ideal for the new user to start their first electrotherapy treatment.

About TENS Therapy (Transcutaneous Nerve Stimulation)

In TENS therapy, a small, battery-operated device delivers low-voltage electrical current through the skin via electrodes placed near the source of pain. It stimulates the nerves in the affected area and sends signals to the brain that blocks the pain perception. TENS is proven to be an effective therapy to mask pain.

Specifications :

Channel	: 2 Channels
Amplitude	: Adjustable, 0-100mA peak (500 ohm load)
Size	: 10.1cm (L) x 6.1cm (W) x 2.45cm (H)
Wave Form	: Asymmetrical Rectangular Biphasic Pulse
Pulse Rate	: 2-150 Hz, 1Hz / Step
Pulse Width	: 50-300 microseconds, 10 us / step
Timer	: 0-90 seconds, 1Sec./ step
Compliance Meter	: 60 sets of individual operation records
Modes	: Burst, Normal, Modulation, SD1 (Strength Duration), SD2
Charging Type	: 9V Battery
Tolerance of Settings	: $\pm 5\%$
Tolerance of Output	: $\pm 20\%$

Accessories :

- x1 Device
- x1 Carrying Case
- x8 Electrode Pads (2x2 cm)
- x2 Lead Wires
- x1 9V Battery
- x1 Instruction Manual

Metal Belt Clip

With Unbreakable, Stainless Steel belt clip, users could easily use this clip to clip on their pants or clothes. Make the treatment portable and everywhere.

Flip Top Cover

Prevent twisting the intensity knobs accidentally when the users are in the treatment.

Non-Slip Bar

Let the users hold on the TENS unit more steady and reduce the chance to drop off the machine.

Liquid Crystal Display (LCD)

Clear and Big LCD Screen can let the users see the settings easily.

FlexSTIM

Medical TENS Unit EMS Muscle Stimulator

FLEX STIM

Information | Features

The FlexStim (EM-6300) features 5 TENS Modes + 3 EMS Modes + 9 Preset TENS Programs. The machine is designed user-friendly, so users can easily start the treatment by pressing simple buttons.

Premier Stim Plus EM-6300 – TENS + EMS Combo Unit with 17 Treatment Modes

The FlexStim (EM-6300) with adjustable intensity and treatment time, users could easily operate their treatment and select the most comfortable setting for themselves. With large Liquid Crystal Display, it clearly shows the selected mode and the treatment remaining time. It's perfect for the users who suffer from chronic pain and also need to relax their muscles.

For the purpose of pain relief, muscle strengthening and muscle relaxing, FlexStim (EM-6300) is definitely an ideal for the users to start their first electrotherapy treatment.

Specifications :

Channel	: 2 Channels
Amplitude	: Adjustable, 0-100mA peak (500 ohm load)
Size	: 11.8 cm (L) x 6 cm (W) x 3.1 cm (H)
Weight	: 157 grams (Battery included)
Wave Form	: Asymmetrical Rectangular Biphasic Pulse
Pulse Rate	: 2-150 Hz, 1Hz / Step
Pulse Width	: 50-300 microseconds, 10 us / step
Timer	: 5-60 minutes or continuous, 5 min./ step
Compliance Meter	: 60 sets of individual operation records
Stimulation Type	: TENS + EMS
Modes	: TENS: Burst, Normal, Modulation, SD1(Strength Duration), SD2 EMS : Constant, Synchronous, Alternate 9 Preset TENS Programs: P1 - P9
Charging Type	: 9V Battery
Tolerance of Settings	: $\pm 10\%$
Tolerance of Output	: $\pm 20\%$

Metal Belt Clip

With Unbreakable, Stainless Steel belt clip, users could easily use this clip to clip on their pants or clothes. Make the treatment portable and everywhere.

Liquid Crystal Display (LCD)

OptiFlex

Smart Laser Therapy System

OptiFlex System unit

Treatment Head

*OptiFlex System
with the carrying case*

Smart Laser Therapy System

Don't Let Pain & Inflammation Slow You Down

OPTIFLEX

Information | Features

The OptiFlex Smart Laser Therapy is a non-invasive, safe and effective treatment modality where light is used to relieve pain, reduce inflammation, and promote wound healing and soft tissue repair. Our laser is with single-wave, multi-wave system and power from 10w to 60w for different market needs. This means deeper penetration with no heat produced allowing faster healing with no knowd side effects.

All areas can be easily treated and improved

- Neck Pain
- Migraines / Headache
- Rotator Cuff Syndrome
- Osteoarthritis
- Muscle Strains / Ligament Sprains
- Carpal Tunner Syndrome
- Lumber Arthrosis
- Tennis / Golfer's Elbow
- Hip Bursitis
- Knee Pain / Ligament Injuries
- Plantan Fasciitis
- Achilles Tendinitis

Why OptiFlex

- Clear multi-function operation mode
- Quick start for fast treatment
- Pre-set protocol
- Self-Set
- Intelligent user/patients data cloud management system
- Multi-wavelength, multi-power, multi-mode operation options for different applications
- Optional function: Thermal Imager

Specifications :

Machine type	: Single wavelength Diode laser therapy
Wavelength	: 808nm/980nm / 1064nm
Power supply	: 200-240VAC, 50Hz
Power	: 15W available
Package	: Aluminum box+ carton
Package demension	: 370mm*320mm*570mm
Gross weight	: 15 kg
Net weight	: 6 kg
Certificate	: CE

Main Office :

No 3, Jalan Pegaga D, U12/D, Desa Alam, Seksyen U12,
40170 Shah Alam, Selangor.
